While African Americans make up 46% of DC’s population, 80% of DC residents who have died due to COVID-19 have been African Americans.

85% of Washingtonians who have died of COVID-19 had underlying chronic conditions, including 70% who had hypertension, 50% who had diabetes, and 70% who had two or more conditions.
Health Disparities in DC

<table>
<thead>
<tr>
<th>Cause of Death</th>

<td>60.2</td>
<td>37.6</td>
</tr>
</tbody>
</table>

Rates of preventable and early detectable cancers (breast, cervical, lung, colon, and liver) are higher in African Americans, Latino residents, and residents in Ward 5, and, most especially, in Wards 7 and 8.

Disparities in health outcomes are directly tied to education, employment, income, housing, transportation, food access, and medical care.
Disparities in Life Expectancy

April 30, 2020
ReOpenDC with a Focus on HOPE

Together, we will build a healthier and more equitable DC – a DC that reflects our shared DC values.

HEALTH • OPPORTUNITY • PROSPERITY • EQUITY
A Healthier, More Equitable Future

A new GW Health Hospital at St. Elizabeths and a new Howard Hospital will improve access to high quality, integrated care for all District residents and help address disparities in health outcomes.
